Please read: Meeting #1 Summary, Behavioral Health Measure Scoring Summaries

Member Introductions 5 minutes

Current Measures Review 40 minutes

High Priority

- Screening for Clinical Depression and Follow Up Plan (NQF #418)
- Tobacco Use: Screening and Cessation Intervention (NQF #28)
- Antidepressant Medication Management (NQF #105)

Standard Priority

- Use of Opioids at High Dosage
 - Use of Opioids from Multiple Providers
-
-

Measures Review for Potential Addition 20 minutes

- Depression Response at Twelve Months – Progress Towards Remission (NQF #1885)
 - Follow-Up After Hospitalization for Mental Illness (NQF #576)
-
-

Future Development 20 minutes

- Unhealthy Alcohol Use Screening and Follow-up
 - Although this initial list is meant to be a starting point for measuring behavioral health care in the primary care setting, the group would like to see measures applying to the care of patients with serious mental illnesses in future core sets.
 - The group recognizes that there is additional need for behavioral health measures designed for the pediatric setting, beyond "Screening for Clinical Depression and Follow Up Plan," for preventive reasons.
 - Pediatric Trauma Screening
-
-

-
-
- The group recommends future selection of a measure that tracks outcome of depression management, such as achieving remission or progress towards remission.
-
-

Measures Recommendation Discussion

5 minutes

Final discussion of measures recommendation to Oversight Committee
