

## Reducing Cancer Disparities to Achieve Equity

February 15, 2022 - 4:30-6:00 PM EST – [Register Here](#)

**Bridging the Gap from Health Disparities to Anti-Racist Clinical Encounters**

*a healthcare equity learning series from partners in equity - Have a Heart Clinic, Kentuckiana Health Collaborative, & Kentucky Nurses Association*

Health equity is achieved when everyone can reach their full health potential, and no one is disadvantaged from this potential due to socially determined circumstances, constructs, or positions. Healthcare must examine its role in creating, perpetuating, and correcting systemic inequities and biases in the healthcare delivery system to achieve equitable outcomes and anti-racist clinical encounters. The purpose of this learning series is to examine healthcare's role and actions in ensuring equitable care and outcomes for all patients. This session will focus on reducing disparities in cancer outcomes and care.

4:30 *Welcome*
