

Edward Miller

Division Director of Maternal Fetal Medicine | University of Louisville Health

Dr. Miller was born and raised in Southern California and attended New York University where he received a B.A. in Anthropology. He obtained his medical degree from Wake Forest University School of Medicine. It was during his time at Wake Forest that he fell in love with the field of Maternal Fetal Medicine and decided that caring for mothers and their families was his mission. He enrolled in Obstetrics and Gynecology residency at Howard University Hospital in Washington DC where he served as House Staff President and received the prestigious resident of the year award. He returned to California to complete Maternal Fetal Medicine training at the University of California San Francisco (UCSF) where he received training in ultrasound and the management of high risk pregnancies from leading experts in the field. During his time at UCSF, he authored numerous publications and presentations and developed his passion for leadership in the realm of Diversity and Inclusion as well as medical education. In his final year of fellowship Dr. Miller was nominated and received the UCSF Innovation award for excellence in Graduate Medical Education. He currently serves as the division director of Maternal Fetal Medicine at the University of Louisville and has a joint appointment as the Chief Diversity Officer for the University of Louisville Health system.
